## The DDS Companies Announce New Environmental Division!

The new Environmental Construction Division will be led by our newest team member-- Thomas Woelfle of Alden, New York.

Tom joins the Company as the Environmental Manager, and brings nearly 30 years of civil and environmental construction experience to the position.

New services under the Environmental Construction Division will include but are *not* limited to:

- Brownfield Redevelopment
- Emergency Spill Response
- Hazardous and Non-Hazardous Waste Removal and Disposal
- Remediation of soil, groundwater and subsurface vapors
- Underground Storage Tank (UST) Removal and Disposal

The **DDS Companies** form a single-source solution team, capable of developing a project from conception through final construction. The various business units combine their skill sets to provide engineering and construction services to institutional, development, and energy customers.

Tom's contact information:
